## 01-00-00

## GENERAL

According to the regulations of the FAR part 23, this service manual provides educated maintenance staff with information necessary for servicing, maintaining and repair of the EXTRA 200. This manual contains a detailed description of systems including time limits for the particular components, troubleshooting and instructions for the performance of inspection and maintenance work. The instructions, that are necessary for disassembly, check, repair, maintenance or overhaul of vendor equipment are not incorporated in this manual. The modification instructions ("Umrüstanweisungen") of installed optional equipment shall be collected in Chapter 95.

Use the following documents in connection with this service manual:

### Aircraft:

- Pilot's Operating Handbook and Airplane Flight Manual
- Parts Catalogue
- Service Bulletins
- Aircraft Record
- Airplane Log Book and Engine Log Book

### NOTE

**Check the following Airplane Log Book documents are up-to-date and in accordance with current LBA regulations. Since the regulations of other nations may require other documents and data, owner of exported airplanes should check with their own aviation officials to determine their individual requirements.**

## SAFETY

To keep the security risks during the execution of the inspection and maintenance work as low as possible, observe the following points:

- Inspection and maintenance work has to be carried out only by qualified and authorized personnel.
- The execution has to be in accordance with the respective national safety requirements.
- Before beginning any work, this service manual has to be read and understood. In case of doubt or lack of information the manufacturer has to be contacted for advice.
- The safety notes given in this manual are to be observed unconditionally.

Refer to Chapter 02-10-06 for information concerning safety notes.
